

Tailor Management

SUBMITTED TO:

Geetanjali College of Computer Science and Commerce (BBA)

AFFILIATED TO:

Saurashtra University

ACADEMIC YEAR:

2024-2025

PROJECT GUIDE:

Jaytika Jogiya

PREPARED BY:

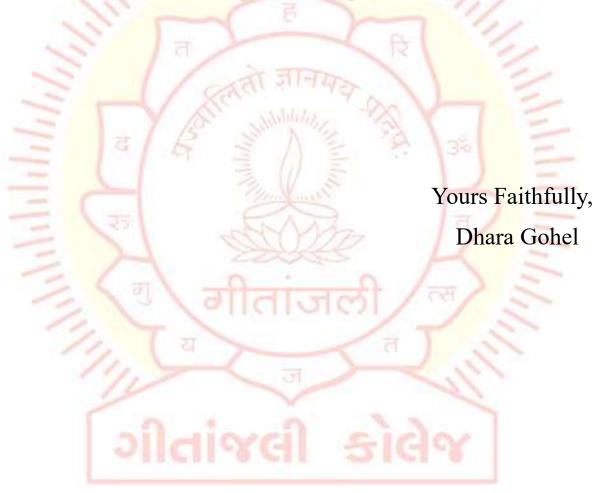

Gohel Dhara

CERTIFICATE

ACKNOWLEDGEMENT

I would like to express my sincere gratitude to Mrs. Mital Goswami for her invaluable advice and assistance throughout the development of this "Tailor Management" project. I would also like to thank our Head of Department, Brijesh Shah, for providing the necessary information regarding this project. Last but not least, I would like to express my gratitude to my family and friends for their invaluable assistance, and I am deeply grateful to everyone who contributed to the successful completion of this project.

PREFACE

- This project report details the design and development of a Tailor Management Software, created as part of my degree at Saurashtra University, using C#.NET and SQL Server in Visual Studio.
- The software streamlines tailoring operations by automating tasks such as customer management, measurement recording, billing, and suit type management, with a user-friendly interface for easy use by tailors.
- Through this project, I gained valuable experience in software design, database management, and application development using modern technologies.

PROJECT PROFILE

PROJECT TITLE	TAILOR MANAGEMENT	
IDE	VISUAL STUDIO 2022	
FRONT END	C#.NET	
BACK END	SQL SERVER	
ACADEMIC YEAR	2024-2025	
DEVELOPED BY	DHARA S GOHEL	
SUBMITTED TO	GEETANJALI COLLEGE	
DOCUMENTATION TOOL	MICROSOFT WORD	
OPERATING SYSTEM	WINDOWS 11	

PROJECT REQUIREMENTS

- > To carry out this project, the following hardware and network setup is necessary.
- ➤ Minimum Hardware Requirements:

RAM	4 GB
CPU	i3 processor
DISK SPACE	500 MB

> Software Requirements:

Operating System	Windows 10 or higher
Development Software	Visual Studio 2022
Database	SQL Server 2016

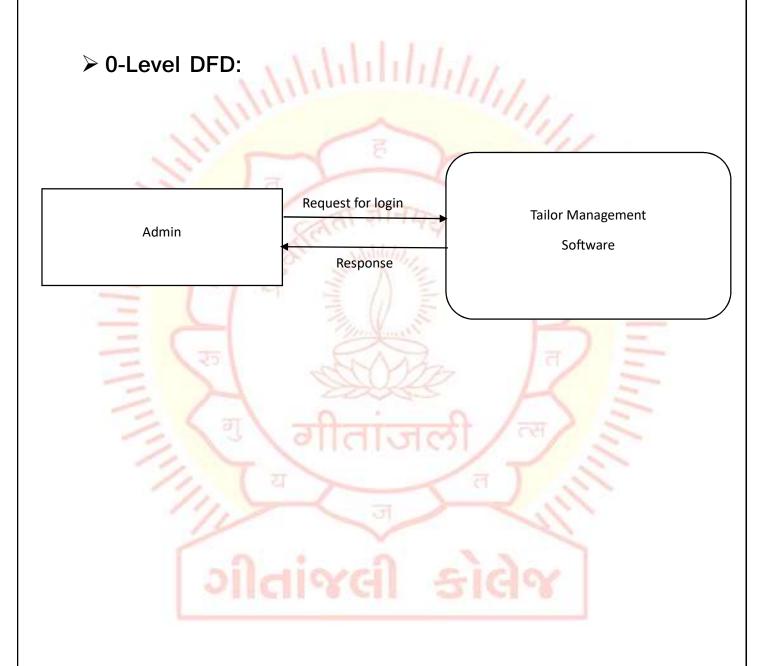

TECHNOLOGY REQUIREMENT

Programming Language	C#.NET
Database Management System	SQL Server
Development Tools	Visual Studio IDE
Framework	.NET Framework

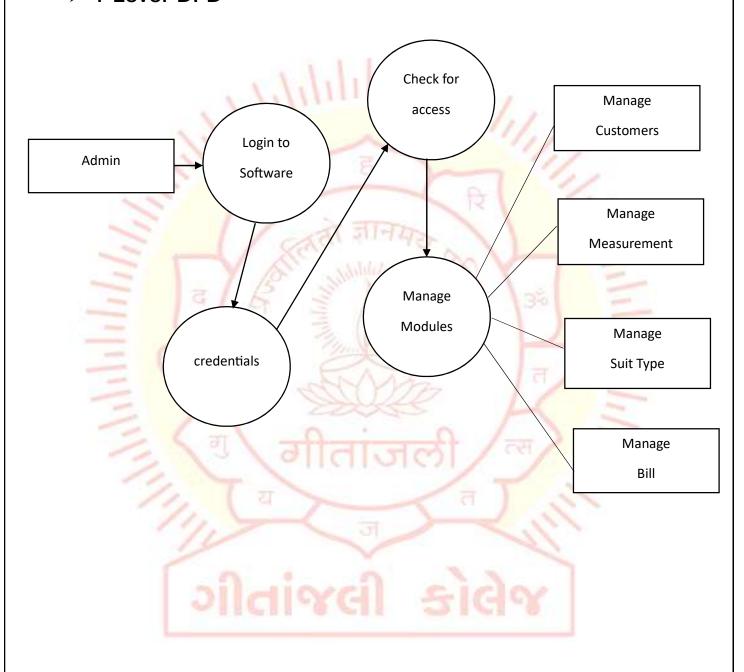

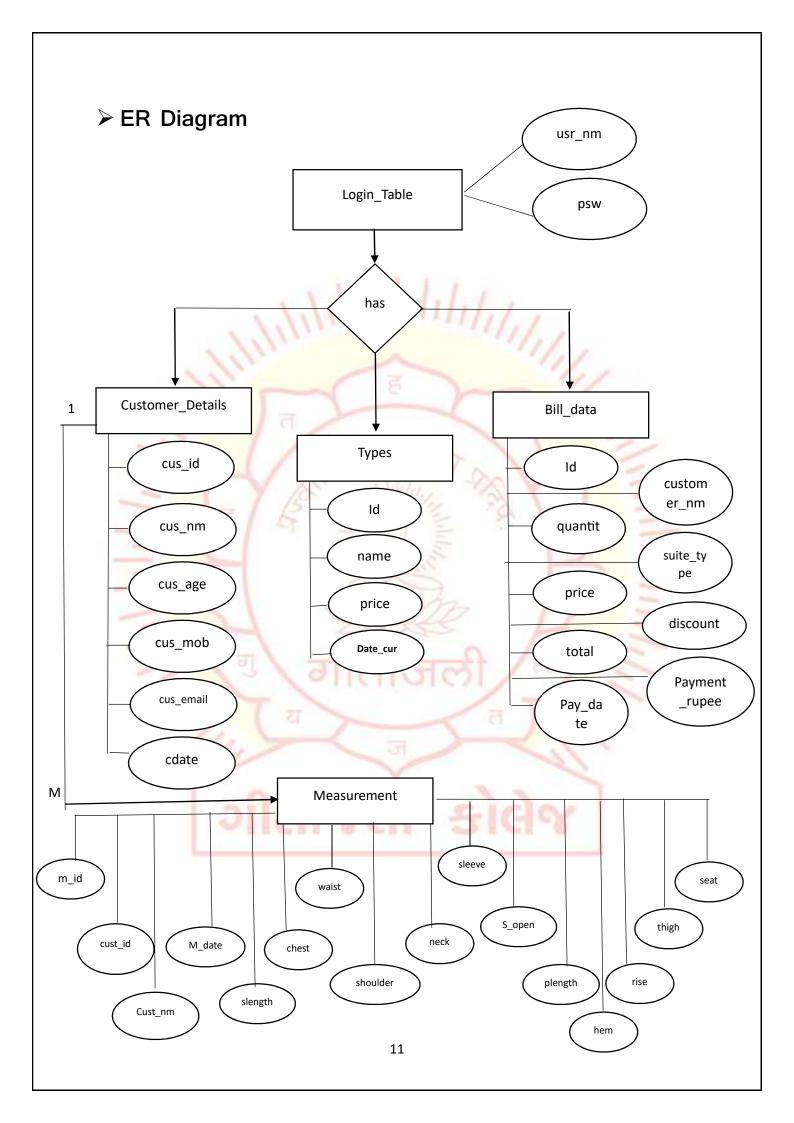

Data Flow Diagram

> 0-Level DFD:

➤ 1-Level DFD

Data Dictionary

Database name : Tailor_management

➤ Login_Table :

Attribute	Datatype	Constraint
usr_nm	Varchar(20)	Not null
psw	Varchar(10)	Not null

Customer_Details :

Attribute	Datatype	Constraint
cus_id	INT	PRIMARY KEY
cus_nm	VARCHAR(50)	NOT NULL
cus_age	INT	NOT NULL
cus_mob	VARCHAR(20)	NOT NULL
cus_email	VARCHAR(100)	NOT NULL
cdate	DATE	NOT NULL

> Measurements:

Attribute	Datatype	Constraint
m_id	INT	PRIMARY KEY
cust_id	INT	FOREIGN KEY
cust_nm	VARCHAR(50)	NOT NULL
m_date	DATE	NOT NULL
slength	VARCHAR(50)	NOT NULL
chest	VARCHAR(50)	N <mark>OT NULL</mark>
waist	VARCHAR(50)	NOT NULL
shoulder	VARCHAR(50)	N <mark>OT NULL</mark>
neck	VARCHAR(50)	NOT NULL
sleeve	VARCHAR(50)	NOT NULL
s_open	VARCHAR(50)	NOT NULL
plength	VARCHAR(50)	NOT NULL
rise	VARCHAR(50)	NOT NULL
seat	VARCHAR(50)	NOT NULL
thigh	VARCHAR(50)	NOT NULL
hem	VARCHAR(50)	NOT NULL

➤ Bill_Data:

Attribute	Datatype	Constraint
ld	INT	NOT NULL,PRIMARYKEY
customer_nm	VARCHAR(150)	NOT NULL
suite_type	INT	NOT NULL
type	INT	NOT NULL
quantity	INT	NOT NULL
price	INT	NOT NULL
total	INT	NOT NULL
discount	INT	NULL
payment_rupee	INT	NOT N <mark>ULL</mark>
pay_date	DATE	NOT NULL

> Types:

Attri bute	Datatype	Constraint
Id	INT	NOT NULL, PRIMARYKEY
name	VARCHAR(100)	NOT NULL
price	VARCHAR(100)	NOT NULL
Date_cur	VARCHAR(100)	NOT NULL

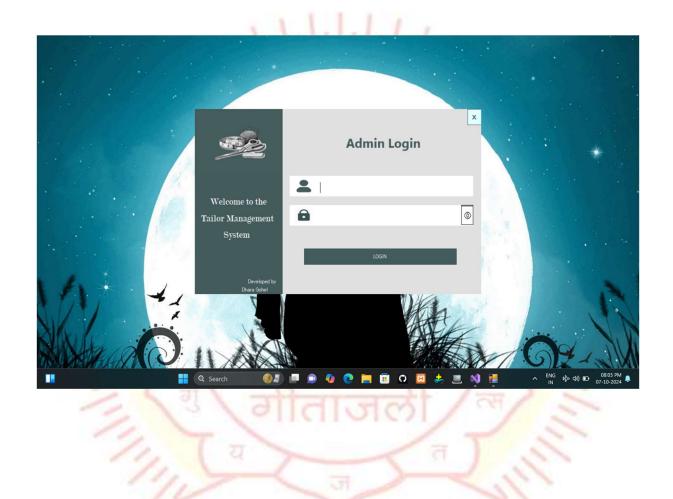

ScreenShots

Loading Page:

Login Page:

Admin can login if credentials is valid

Home Page:

This page show total customers count and total amount

Customer Details Page:

• In this page admin can add,edit and delete customers

Measurement page:

• In this page admin store already exist customer measurement.

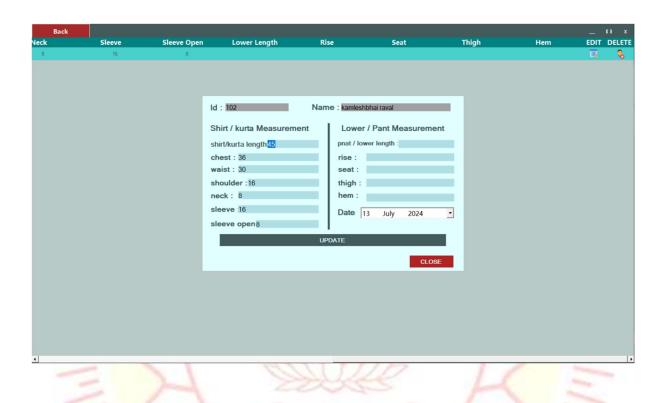

View Measurement:

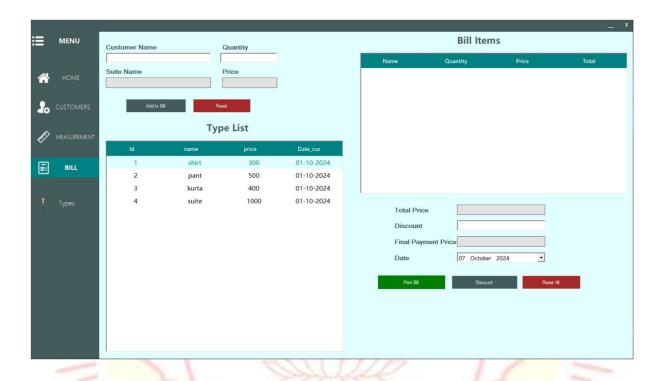

Update Measure Page:

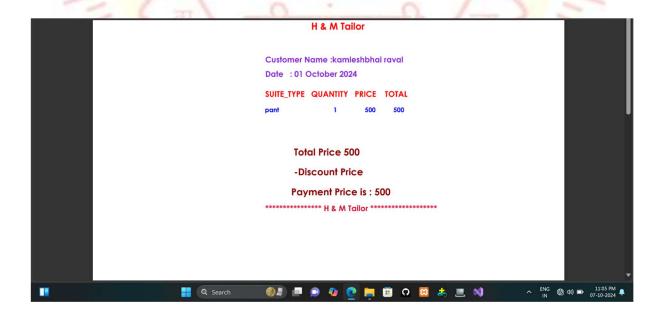

• Using this page admin update measurement of customer.

Bill Page:

• Using this page customer Bill generate with discount price

Suit Type Page:

• In this page admin add suit type(e.g. shirt,pant) and give this price

Future requirements of project

User Authentication and Role Management: Implement advanced user roles and permissions.

Enhanced Reporting Features: Provide detailed sales and customer reports.

Inventory Management: Track fabric and material stock.

Mobile Application: Develop a mobile version for better accessibility.

Automated Reminder: Send automated SMS or email rreminders to customers for pending payment.

Order and Production Management: integrate an order tracking system to manage the production status of each garment, such as "In Progress," "Ready for Fitting," "Complete," or "Delivered."

Limitations

Single-user access:

The system currently supports only **one admin user**, which limits scalability and the ability to handle multiple users or staff roles like tailors or cashiers

No control Panel:

Customers cannot access their own order information, track progress, or make updates. All interactions with the system must go through the admin.

Local System Dependency

• The software is built to run on a local machine, which limits accessibility. Admin must be physically present at the location where the software is installed.
